Dear Kumananda, dear Srichandan,

I let you know that I have received from our University some money (about 3000 euro), for the travel to your University in the frame of the approved renewal of our agreement.

I know this is a very bad time, Covid is still spread, but fortunately the funds can be used until the end of 2023. I hope I can visit you when the health situation will improve in the future. In the same time we can plan in the future, the venue in Naples lab of a good student (as he was Srichandan at that time). I can support him with some money for accomodation. However, there is still time to discuss about it.

I hope you are fine and that as soon as possible you can produce some endophytic fungi we can isolate bioactive metabolite.

Kind Regards, greetings to Prof. Jha.

Alessio
